

The East Jerusalem Environmental Center

Dear WRAP members,

We wish to thank you for supporting Only Green, the East Jerusalem Environmental Center, and providing funding for the construction and maintenance of the raincatcher system at the Afack School in Sur Baher. Your support, which also includes funding for the educational element of the project in the coming years, enables us to develop environmental awareness among the students by focusing on water and its vital importance.

The raincatcher system was installed right before a major rainstorm, and we were delighted to see that soon afterwards the tanks were overflowing with precious rainwater. The water collected is being used for flushing toilets in the school.

We thank you for your help and encouragement, and look forward to thanking you in person here in Jerusalem and showing you the system.

Sincerely,

Fuad Abu Hamed
Project Chairman
